Shenmi Fusu, written by Fo Qian Xian Hua, is a Chinese supernatural horror novel following Yang Jian's struggle to survive paranormal incidents. Its threats often follow specific rules, making observation and deduction essential to finding a way out.

Vacancy adapts this approach to horror into an interactive-fiction experience. Players investigate a shrine and uncover connections between names, an offering ledger, and a bronze bell. Borrowing the Ghost Eye's power can solve an immediate problem, but increases the risk of losing oneself. Careful observation offers another path.

At 2:17 a.m., the subway exit becomes a shrine. From behind its door, your mother's voice calls your full name. A stranger grips your sleeve. "Don't answer." You look down. Your name is slowly appearing in the wood.
